Distributed by:

HS-VAPORSORB

HS-VAPORSORB refillable v-bank filter is designed to work in both commercial and industrial applications. It can be easily retrofitted in any HVAC system or custom OEM applications, due to its extraordinary versatility and design.

The HS-VAPORSORB refillable v-bank filter offers an economical solution for removal of various contaminants due to its high efficiency and long-life span. A full-sized filter will hold 0.33 cubic feet of gas phase removal media. Effective with a variety of contaminants including; smoke, diesel fumes, chemical contaminants, unwanted food odors, formaldehyde, ozone and many indoor and outdoor pollutants.

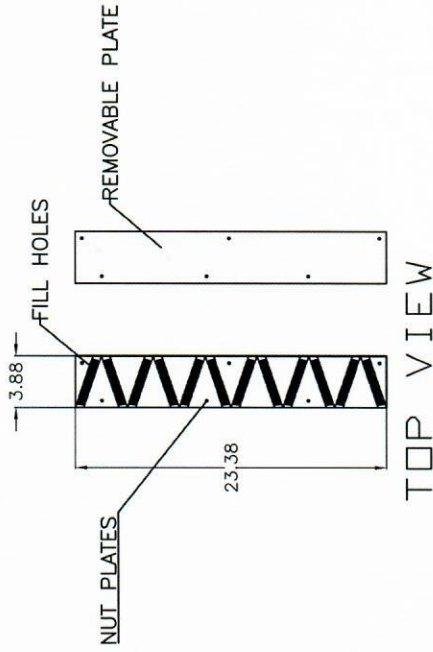

HS-VAPORSORB is effective in a variety of industries including;

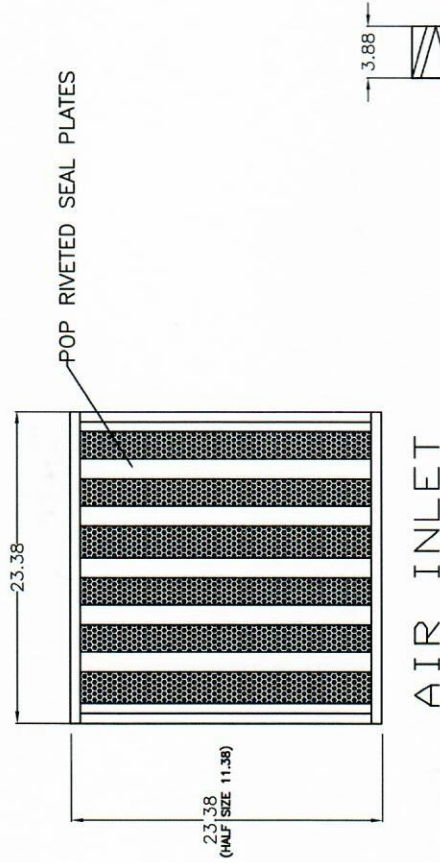

- **Airports & Control Towers**
- **Hospitals**
- **Museums & Archives**
- **Semiconductor Applications**
- **Industrial Facilities**
